

BIOSITE MANNED SECURITY SERVICES

Experienced - Reliable - Professional

Biosite understands that sites across the UK require experienced, reliable and professional security personnel, in order to operate efficiently and effectively.

The Biosite Security division provides fully vetted SIA trained security officers to assist in the smooth running of construction sites nationwide. All staff are fully qualified and trained to use the full Biosite product range.

Biosite manned services include:

- Security Guards
- Concierge Personnel
- Gateman/Qualified Banksman
- Traffic Marshalls
- Dog Handlers
- Cleaning

Why Choose Biosite Security?

- All officers are fully vetted and trained to operate Biosite software
- All officers are CSCS card holders
- SIA badge holders (legal requirement)
- 24 hour control room
- Dedicated operations individual as your first point of contact

CSCS Compliant Only

As a CSCS partner Biosite Security has adopted health and safety practices, which confirm their commitment to providing only CSCS, trained officers on client sites (if applicable). Biosite can provide CSCS details of all officers when issuing assignment instructions and RAMS.

Qualified professional security personnel

Biosite believe that having an experienced and reliable Gateman/Traffic Marshall is one of the most important requirements on site. These individuals are the first to face the public and often act as a barrier to prevent unwanted intruders or vehicles from entering site. All Biosite Gatemens and Traffic Marshalls are fully qualified and are required to attend a refresher course on an annual basis.

Nationwide Coverage

Biosite Security have excellent connections and recruit nationally, meaning they can provide fully qualified and reliable officers to your site no matter where you are located. Biosite operate a national programme for training guards and gatemens and can meet individual training needs for all main contractors and site requirements.

Site Specific Policies

Biosite understand that each site has different safety requirements and risks. Biosite Security will visit site before placing an officer on duty and will carry out Risk Assessment and Method Statements against HSE and site specific checklists. These are reviewed by Biosite CMIOSH consultant. As standard, each site will review: site log book, RAMS, spare uniform (cold weather), assigned member of operations as contact.

- **Management visits:** Biosite's in house team will meet with officers on a fortnightly basis to ensure performance is maintained and welfare is sufficient.
- **Out of hours:** Biosite operate a 24 hour control room and have multiple mobile officers on the road. Out of hours, officers are monitored on site - ensuring safety and welfare.
- **Site management:** You will be assigned a dedicated operations individual as your first point of contact. On a monthly basis your security requirements, staffing levels, and service level standards are reviewed.

Gatemens & Banksman
